

NAME _____

Earth's Changing Surface Communicate

ALL LEVELS
Student Books,
page 9

Use this page and the **Image Bank** for additional practice with the science process skill of communicating.

Skill Focus

- When you **communicate**, you share what you know and observe with others.
- It is important to communicate clearly.
- You can communicate in many different ways. People communicate through words and pictures. They even communicate through their actions, or by the things that they do.

Practice

Read each of the descriptions below. Then write a sentence that tells what the person or object in the description is trying to communicate.

1. I walk into the library. I see my friend, Juan. He waves his hand at me. What is Juan trying to communicate?

2. Kelsey is driving a car. She sees a red sign with eight sides. What is the sign trying to communicate?

3. Pedro has the lead role in my school's play. His father tells him to "break a leg." What is his father trying to communicate?

Apply

- Choose three images on the **Image Bank** that show people or objects communicating.
- Show the images to a partner.
- Have your partner describe how the people or objects are communicating.
